

Sustainability at Corteva Agriscience

Engaging with Stakeholders

Stakeholder engagement is an essential element of our Enriching Lives Together Sustainability Strategy.

Stakeholder engagement is an essential element of our Enriching Lives Together Sustainability Strategy. We value the perspectives and insights of a wide range of stakeholders, including suppliers, customers, peer companies in the value chain, NGOs, communities, government bodies, scientists, and trade associations. Collaboration will be necessary to reach the ambitious targets we have set. We can achieve more when we work together and when we start with those who already have a stake in stewarding our future.

We have engaged stakeholders in our materiality assessment and through the development of our 2030 sustainability goals. Understanding the needs and interests of our stakeholders has been crucial to focus our strategy, identify priorities and target activity where we can have the most positive impact. It will be equally crucial moving forward as we monitor and report on progress.

Stakeholder engagement can take many forms, including but not limited to education/information sharing, innovation and collaboration, incentivization, compliance and onboarding, and information collection.

We are committed to continuing to engage stakeholders through our Enriching Lives Together Sustainability Strategy, consistent with our purpose and values.
